

YOU ARE INVITED!

to a celebration of

Tuesday, April 25th 5:30-7:30pm at Gulf Islands Secondary School

An evening of games and hands-on activities for kids of all ages, families, and everyone interested in exploring and having some fun with math. Snacks will be provided.

Guest Speaker

Guest Speaker: Richard Hoshino from Quest University
Serving a Small Community Through Mathematical Activism

“In my classes, students learn the powerful problem-solving technique of reformulating hard real-world problems into simpler equivalent math problems, which empowers these students to make explicit connections between abstract theory and applied practice. Now that I’m living in Squamish, I have the fortune of applying my problem-solving skills to serve our small community; the best part of this is involving my students.”

“In this talk, I’ll share with you some of the projects that our students have implemented to serve our local community, including an activity timetabling program for the Britannia Mine Museum, and an automated shift scheduler for 30 employees at a local café.”
